

Dear patient,

You have just been admitted to the Hopital Privé Toulon Hyères – Saint Roch, a Sainte-Marguerite health care facility. Our medical practitioners, support staff and management team thank you for your confidence.

In accordance with the legislation in effect, this patient information booklet, as its name suggests, brings together the medical and administrative information needed to ensure the quality and safety of the care that you will receive.

You must carefully **read and complete** the various documents (information sheets, questionnaires, authorisations) that make up this booklet. They are indispensable for your admission to our health care facilities. **You can, if needed, fill out these documents with the help of your loved ones.**

Further information will be provided to you by the anaesthetist whom you will meet and by the medical practitioner who will be treating you.

If your state of health or medical condition requires you to be hospitalised, you will also receive our welcome booklet providing further information about your stay.

We hope that this information booklet helps you to feel confident about the quality and safety of the care provided at Sainte-Marguerite facilities.

Dr Bruno Thiré, Chief Executive

... CONTENTS ...

I. Required information and authorisations

1. Information from your medical practitioner about the proposed surgery (informed consent for surgery)
2. Information from the anaesthetist about the proposed type of anaesthetic (informed consent for anaesthesia)
3. Evaluation of risks related to unconventional transmissible agents (prions)
4. Anaesthesia file

II. Designations / Administrative and medical authorisations

PLEASE COMPLETE IF YOU ARE...

An adult patient's representative or legal guardian

Please complete this section if the patient does not have the capacity to complete the booklet or understand this information

Holder(s) of parental responsibility for a patient who is a minor

Articles 371-1, 372, 372-2 of the French Civil Code (*Code civil*)
Articles L.1111-5, R.1111-2, R.1112-35 of the French Public Health Code (*Code de la santé publique*)

The signatures of both parents are compulsory when the parents share parental responsibility (e.g. a child born of married parents or born of unmarried parents who officially recognised the child in his or her first year of life). If one of the parents is far away, it is possible to send us the information in this booklet with his or her signature by fax, or post

**This information booklet must be completed and signed by the holders of parental responsibility and presented before the pre-anaesthesia consultation.
If not, the procedure may have to be postponed.**

The signatories of this booklet certify and attest that the exercise of their parental responsibility has not been limited by a court decision. Otherwise, a copy of the decision must be sent to your doctor as soon as possible.

The holders of parental responsibility:

- undertake to share information with each other about the hospitalisation of their child, the care and treatment provided to him or her and any changes in his or her state of health;
- each attest that the contents of this booklet have been fully explained to him or her and that he or she has read, completed and understood the booklet;
- each attest to the accuracy of all the information about him or her in this booklet.

father,⁽¹⁾ (surname and first name)

mother,⁽¹⁾ (surname and first name)

legal guardian,⁽¹⁾ (surname and first name)

of the child or the adult under guardianship (patient's surname at birth and first name)

born on in

authorise the anaesthetist to anaesthetise this child (or this adult under guardianship),

and Dr (doctor's surname and first name)

to operate and provide all necessary care and treatment for his or her state of health.

**Signature of the father and mother or legal guardian⁽¹⁾ of the child or of the adult
under guardianship**

(1). **The signatures of both parents are mandatory if parental responsibility is shared** (e.g. a child born of married parents or born of unmarried parents who both recognised their child in his or her first year of life).
Please cross out those that do not apply

I. Required information and authorisations

1. Information provided by the medical practitioner about the proposed surgical procedure

ACKNOWLEDGEMENT OF UNDERSTANDING THE INFORMATION INFORMED CONSENT FOR SURGERY

As requested by Dr....., and in order to comply with **legal obligations**, I, the undersigned, Mr/Mrs/Ms, born on / /, declare that I have been **informed** in detail by him/her about the serious risks, including life-threatening risks, inherent in any surgical procedure and, in particular, infectious risks that might arise from the procedure that I shall undergo.

I have been informed of the existence of a specific percentage of serious **complications**, possible **after-effects** and **risks**, including life-threatening risks, relating not only to the medical condition and any pathological associations that I may have, but also to unexpected individual reactions and possible medical accidents.

I have been able to ask the surgeon all my questions about the surgery. I have noted that, in addition to the previously mentioned risks, there is unpredictability with regard to duration, specific aspects of anatomic areas, the healing process, and rare or even unknown risks.

I have been informed by the surgeon of the expected **benefits** from this operation, the risk of failure or a disappointing outcome, therapeutic **alternatives**, as well as the possibility of a later need to operate again. The **explanations** provided were done so in sufficiently clear terms to enable me to make my decision and **ask** the surgeon to perform this operation.

I have also been informed that, during the operation, the surgeon may be confronted with a discovery or an unforeseen event necessitating additional or different procedures from those initially planned, and I hereby authorise the surgeon, in such conditions, to perform any procedure that he/she deems necessary and, to this end, to be assisted by another medical practitioner if required.

I expressly undertake to go to the planned consultations, undergo all treatments and follow all precautions and recommendations prescribed to me before and after the surgery.

I trust Dr to use all means at his/her disposal to reach the hoped-for outcome.

This document does not constitute a liability release, but rather an acknowledgement that I have understood the information provided.

Done in..... on.....

Name and signature of the medical practitioner who is responsible for the patient

Surname at birth and signature of the patient or the patient's representative (preceded by the words "read and approved")

2. Information provided by the anaesthetist about the proposed type of anaesthesia

INFORMED CONSENT FOR ANAESTHESIA

I declare that, during my anaesthesia consultation with Dr, I have been fully informed of the benefits and risks of anaesthesia. I have been able to ask all the questions that I deemed useful and I have understood the answers that were provided to me.

I accept all useful modifications to methods during the procedure.

This document does not release the anaesthetist from his or her liability with respect to me.

Done in..... on.....

Name and signature of the anaesthetist

Surname at birth and signature of the patient or the patient's representative (preceded by the words "read and approved")

3. Evaluation of risks related to prions (unconventional transmissible agents)

You are about to enter the hospital to undergo a diagnostic or therapeutic procedure. In order to detect and prevent a potential risk of transmitting Creutzfeldt-Jakob disease and other transmissible spongiform encephalopathies (TSEs), and in compliance with Instruction DGS/RI3 no. 449 of 1 December 2011 and Circular DGS/SD5C/DHOS no. 435 of 23 September 2005, we ask you to answer the following questions, if necessary with the help of your doctor.

1. Have you ever been treated for a growth disorder through the injection of human growth hormone? Yes No
2. Have you ever undergone a procedure involving a human dura mater graft? Yes No
3. Has any member or your genetic family had a transmissible spongiform encephalopathy linked to a mutation in the gene encoding PrP? Yes No
4. Have you been identified as having received labile blood products from a donor subsequently recognised as having Creutzfeldt-Jakob disease? Yes * No

*If the answer is yes, any invasive procedure will be deemed at risk with regard to prions.

I, the undersigned, attest to the accuracy of the information provided above.

Date, surname at birth and signature of the patient
or the patient's representative

P a r t i e r é s e r v é e a u p r a t i c i e n

Le patient présente-t-il après élimination des autres causes possibles, un signe neurologique d'apparition récente et d'évolution progressive sans rémission, d'au moins un signe clinique neurologique (*Myoclonies, troubles visuels ou cérébelleux ou pyramidaux ou extrapyramidaux, ataxie, chorée, dystonie, symptômes sensitifs douloureux persistants, épilepsie, mutisme akinétique*) associé à des troubles intellectuels (*démence, ralentissement psychomoteur*) ou psychiatriques (*dépression, anxiété, apathie, comportement de retrait, délire*).

Si le patient présente une suspicion d'EST, il faut revoir l'indication de l'acte et demander au préalable un examen neuropathologique et si la conclusion est positive en faveur d'une suspicion, il faut appliquer les modalités de traitement recommandées dans l'Instruction N°449.

Selon le processus déclaratif du patient et l'examen clinique, veuillez cocher la case qui correspond au niveau où se répertorie le patient :

General information about anaesthesia

Département d'Anesthésie-Réanimation
Hôpital Privé Toulon Hyères – Saint Roch
99 Avenue Saint-Roch
83000 TOULON
Tel : 04 94 18 89 00 Fax : 04.94.18.89.23

The aim of this anaesthesia file is to provide you with information about anaesthesia, including its advantages and risks. We ask you to read it carefully so that you can give your informed consent to the anaesthetic procedure that the anaesthetist will plan for you. You can also ask the anaesthetist questions about your anaesthesia. Regarding the medical procedure requiring anaesthesia, the specialist who will carry out that procedure will be able to answer your questions.

What is anaesthesia?

The term “anaesthesia” covers the techniques used to eliminate or decrease pain during surgery, obstetrics or medical examinations (e.g. endoscopy, X-rays, etc.).

There are two main types of anaesthesia: general anaesthesia and local anaesthesia.

General anaesthesia is a state similar to sleep and is induced through the intravenous injection of medication and/or breathing in anaesthetic gases with the appropriate equipment.

Local anaesthesia uses various techniques to numb only the part of the body undergoing surgery. To do so, a local anaesthetic is injected into this area to numb the nerves. A general anaesthetic may be combined with local anaesthetic or become necessary if the local anaesthetic proves insufficient.

Spinal anaesthesia and epidural anaesthesia are two specific types of local anaesthesia whereby the anaesthetic is injected close to the spinal cord and the nerves that branch out from it.

Any general or local anaesthesia performed for a non-emergency procedure requires a consultation several days in advance and a pre-anaesthesia visit the day before or a few hours before the anaesthesia, depending on the hospitalisation conditions.

During the consultation and the visit, you are encouraged to ask any questions that you consider useful. A decision on the type of anaesthesia to be used will be made on the basis of the procedure, your state of health and the results of any additional tests that may or

may not be ordered. The anaesthetist who will perform your anaesthetic procedure is responsible for making the final decision.

How will I be monitored during anaesthesia and upon awakening ?

Anaesthesia, regardless of which type, takes place in a room equipped with appropriate equipment that is adapted to your case and checked before each use. Anything that is in contact with your body is either disposable or is disinfected or sterilised. After the procedure, you will be taken to a post-anaesthesia care unit (recovery room), where you will be continuously watched. Then you will go to your hospital room or leave the hospital.

During anaesthesia and the time spent in the post-anaesthesia care unit, you will be taken care of by qualified nursing staff under the responsibility of an anaesthetist.

What are the risks of anaesthesia?

Any medical procedure, even when carried out skilfully and in accordance with established scientific knowledge, carries a risk.

Modern methods of monitoring anaesthesia and awakening allow us to detect any anomalies and to treat them quickly. For this reason, it is important to tell the anaesthetist and the nursing staff monitoring you if you feel any pain or discomfort during or after anaesthesia.

What are the disadvantages and risks of a general anaesthetic?

Nausea and vomiting upon awakening have become less common thanks to new techniques and new medicines.

Incidents arising from vomit going into the lungs are now very rare, especially if the fasting guidelines are properly followed.

The insertion of a tube into the trachea (intubation) or into the throat (laryngeal mask) to ensure respiration during anaesthesia may cause a sore throat or temporary hoarseness.

Damage to teeth may also occur. For this reason, it is important to notify us if you wear any kind of denture or if your teeth are fragile in any way.

A painful redness may occur around the vein where the medication has been injected. It will disappear within a few days.

Prolonged immobility on the operating table may cause compression, particularly of some nerves, leading to numbness or, in rare cases, paralysis of an arm or a leg. In the majority of cases, everything returns to normal within a few days or weeks.

Temporary memory problems or a lowered ability to concentrate may occur in the hours following the anaesthetic.

During the 24 hours after anaesthesia, you are strongly advised not to drink alcohol, drive a vehicle, use potentially hazardous equipment or make any important decision because **you might have decreased alertness without realising it.**

Unforeseen life-threatening complications such as a serious allergic reaction, cardiac arrest or asphyxia are extremely rare. We mention these examples, but hundreds of thousands of anaesthetic procedures of this type are performed every year without incident.

What are the disadvantages and risks of a local anaesthetic?

After spinal anaesthesia or epidural anaesthesia, headaches may occur, requiring several days of rest and/or a specific local treatment.

Temporary paralysis of the bladder may necessitate the fitting of a urinary catheter.

Pain around the puncture site on the back may also occur. If a problem arises, it may be necessary to use a second puncture site during anaesthesia.

The administration of morphine or one of its derivatives may cause temporary itching.

Very occasionally, a temporary decrease in visual or auditory acuity occurs.

Depending on the combination of medications used, temporary memory problems or a lowered ability to concentrate may occur in the hours following the anaesthetic.

More serious complications such as convulsions, cardiac arrest, permanent paralysis or varying degrees of loss of feeling are extremely rare. We mention these examples, but hundreds of

thousands of anaesthetic procedures of this type are performed every year without incident.

During local anaesthesia for eye surgery, damage to the eyeball is extremely rare.

I request that my anonymity be protected and my stay at your facility be kept confidential.

Designating a trusted person

In accordance with Law no. 2002-303 of 4 March 2002 on patients’ rights and the quality of the health system, specifically Article L1111-6, the patient can designate a **trusted person** who will be consulted should the patient become unable to express his or her desires and who will receive the required information for this purpose.

I wish to designate a trusted person :

Surname, first name: Date and place of birth:

Address:

Telephone number: Mobile phone number:

- This legally competent person is: A friend A relative My general practitioner
- I would like this person to support me through the whole process and to be present during my medical appointments in order to help me with my decision-making: Yes No

I have been informed that this designation covers the whole duration of my hospitalisation. I can cancel this designation at any time. In such a case, I undertake to inform the hospital in writing.

To be signed by the trusted person:

I, the undersigned,
declare that I have been informed of my designation as the trusted person.

The trusted person’s signature

Signature box containing a pen icon.

I do not wish to designate a trusted person: I declare that I have been informed of the possibility provided to me to designate a trusted person for the duration of my hospital stay. I do not, however, wish to designate a trusted person. I am aware that I can still designate someone at any time and, in such a case, I undertake to inform the hospital of my choice in writing.

**Signature of the patient
or the patient’s representative**

Signature box containing a pen icon.

**The management, support staff and medical team
thank you for taking the time to read all the information in this booklet,
which is indispensable for treating you in our facility,
in compliance with the recommendations of
the French National Authority for Health (HAS).**
